

VENGEANCE

A Jake Prescott Novel

Ian Kent

While Jake Prescott and his staff try to take some well-deserved time off, a monster from their past awakens, triggering the murder and mayhem memories of the past year. At that time, they had learned that someone, or some organization, was trying to eliminate scientists or anyone highlighting the global warming crisis. Slowly, they realize that all the efforts and analysis they had accomplished in the previous year might have been concentrated on the wrong industry. Although some of the problems had been directed either by or towards the petroleum industry, they suddenly learn the main cause of global warming might be the animal-agriculture and meat-growing industry. Jake Prescott and his beautiful girlfriend Sabrina Wagner try to catch some sun and relaxation in Buenos Aires, Argentina. Their plans for a romantic vacation are cut short when an old school chum, Mateo Perez, contacts Jake. Working for the Buenos Aires police and Interpol, Mateo is dealing with the environmental resistance to the huge animal-agriculture industry. Jake joins forces with Mateo but they are both sidetracked and stalled by the actions of major Balkan drug cartels working in South America. Before long, they are all involved in another dangerous game of cat and mouse with a familiar enemy from Jake's past, who is not only determined to stop this talk about global warming, but is involved with major street gangs and drug cartels . . . a game with deadly results.

GENRE:	Fiction		

ABOUT THE AUTHOR: Ian has always been a multifaceted individual, a person who, when confronted with a challenge or a new interest, does not hesitate to learn a new skill. Described by family and friends as a "renaissance man," as a young man he defied the norms, bought a fishing boat and fished the BC coast, a project that grew into other scary adventures. He now lives with his wife Diana in Tsawwassen, a coastal community in South Delta about twenty-five miles south of Vancouver. More than thirty years of work in the environmental industry and international travel and languages has provided him with a wealth of detail and experience to write about the subjects covered in his books.

A LOOK INSIDE

As he bent over to pick up his wine glass, Jake barely felt the wind of a high speed bullet as it passed within inches of his head. When the bullet hit the wine decanter on the shelf above him, glass and wine exploded around him.

“Everyone down!” he shouted, “This is it!”, and the entire gang went into their planned survival mode with a mad scramble for shelter. Then silence. Everyone froze, trying desperately not to make any noise as they listened for further attacks. Whoever had taken that shot, seemed to be farther away, as nothing happened for a short time . . . forever to those hiding. Suddenly, all Hell broke loose and more bullets sprayed across the patio, missing the few still crouching flat on the ground. Everyone had an escape plan, and as the assailants moved in, they had moved around behind trees and other protection, taking aim with whatever weapons they had. There were three men, all acting very confident as they approached the patio, one with a rifle, and the other two with automatic pistols, intent on eliminating them all.

Mateo jumped up and tried to slow down one of the assailants aiming his weapon towards Elena. The man turned and shot one burst, hitting Matt in the shoulder, knocking him clear.

Sabrina jumped up and yelled “Hey! You big son-of-a-bitch!” The man turned and Sabrina’s little Pico plugged a 38 calibre slug right between his eyes.

When Nicholas saw the other man heading towards Paula, he stepped right in his way and before the man had a chance to do anything, Nicholas’ 12 gauge escopeta boomed, blowing a large hole in the man’s chest.

The third man didn’t have a chance, before he could raise his weapon again, Marko and one of his men dragged him to the ground, beating him senseless. It was all over in minutes, and Matt had the man in handcuffs and was on his phone as Elena treated his wounds.
